GitHub | Linkedin | Portfolio

**Phone: +880179-6048427**

**Uttara , Dhaka**

## CAREER OBJECTIVE

Passionate and detail-oriented Full-Stack Developer with a strong foundation in Next.js, TypeScript, and PostgreSQL. Skilled in integrating secure, efficient APIs to deliver smooth and reliable user experiences. Committed to continuous learning and contributing value in an innovation-driven, collaborative environment .

## SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js,TypeScript, Tailwind CSS, Shadcn/UI, Axios, TanStack Query, Zod
- **Backend:** Node.js, Express.js, MongoDB, PostgreSQL, Prisma ORM, JWT, Better Auth, RESTful API
- **Tools & Others:** Git & GitHub, VS Code, Netlify, Vercel
- **Soft skills :** Communication, Time management, Collaborative mindset

## PROJECTS

### MessFlow – Mess Management Platform (Full-Stack)

Live Site | Client code | Server Code

MessFlow is a mess management platform with meal tracking, bazar management, event handling, and a detailed financial ledger system for mess members and admins.

**Technologies:** Next.js, TypeScript, Tailwind CSS , Shadcn/UI, TanStack Query, TanStack Form, Zod, Axios ,Node.js, Express.js, PostgreSQL, Prisma ORM, Better Auth, JWT, Nodemailer, Zod

**Key Features**

- Daily meal tracking system with hot meal event support, allowing members to manage and update meal preferences in real time.
- Integrated bazar entry module where members can log daily market expenses, automatically distributed across all active members.
- Comprehensive ledger and cost history dashboard offering transparent breakdown of individual and collective mess expenses.

### LibraryLoop – Library Management System (Full-Stack)

Live Site | Client code | Server Code

LibraryLoop is a full-stack web app for an online library platform featuring AI-powered book summaries, personalized recommendations, and book borrowing/return management.

**Technologies:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Firebase Auth

**Key Features**

- **AI-Powered** Book Summaries & Recommendations using Gemini API for concise, personalized reading suggestions.
- Seamlessly borrow and return books online with an easy-to-use interface, tracking due dates and availability in real-time.
- Easily manage books by adding, editing, or removing entries to maintain an accurate and updated library.

### SwiftShop - E-commerce Platform (Full-Stack)

Live Site | Client code | server Code

SwiftShop is a full-stack e-commerce application built with the full stack, featuring product browsing, cart management, order placement, authentication, and an admin panel with a responsive UI.

**Technologies:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB,JWT, Firebase Auth

**Key Features**

- Implemented secure user authentication and authorization using JWT, enabling protected routes for cart, orders, and admin dashboard.
- Developed a dynamic cart system with real-time product updates, quantity adjustments, and persistent storage using localStorage.
- Built an admin panel for product management (add, update, remove) with a responsive design.
